

CLAIMS:

1. A manually operated pump comprising:
two cylindrical members with a first cylindrical member slidable within a
5 second cylindrical member;
wherein one end of the first cylindrical member is provided with a fitting to
receive a saddle;
wherein said second cylindrical member is provided with a foot stand
assembly which comprises a foldable foot stand and a retractable air hose.
10
2. The manually operated pump according to claim 1, wherein said pump is
provided with a manually graspable member for operating the pump.
3. The manually operated pump according to claim 2, wherein the manually
15 graspable member is a saddle.
4. The manually operated pump according to claim 1, 2 or 3, wherein the two
cylindrical members are latched together in a releasable manner.
- 20 5. The manually operated pump according to claim 4, wherein the latching is
achieved by means of inter-engaging projection and recess on the foot stand and
first cylindrical member.
6. A cycle comprising a tubular section receiving a seat post, the post being in
25 the form of a pump according to any one of the preceding claims.
